San Jose, CA

- **GPA:** 4.47/4.0 | **SAT:** 1590/1600
- **Honors:** Valedictorian, Original Oratory Speech CA State Champion, National Personal Finance Challenge Top 3

WORK EXPERIENCE

Fidelity Investments

Full Stack Development Intern

June 2023 – Aug 2023

Durham, NC

- Designed and implemented a knowledge graph of more than 55k digital assets at Fidelity (APIs, SDKs, apps, etc.) using Neo4j graph DB
- Optimized performance by decreasing data storage space by 17% and reducing average search query time from an average of 1.5s to less than 200 ms
- Created REST api that allowed other developers to interact with the DB using FastAPI with endpoints ranging from basic CRUD operations to advanced querying
- Built chatbot that dynamically generates database queries based on user inquiries and converted query results to natural language using GPT4All

Focal LLC

Co-Founder

Sept 2020 – Aug 2022

San Jose, CA

- Developed backend using Firebase and Google Analytics for Focal, a centralized productivity platform
- Designed and built task manager front-end with Figma and Flutter
- Garnered over 18k downloads on iOS app store/Google Play store

Moonshot Jr.

Project Intern

Jun 2020 – April 2021

San Jose, CA

- Collaborated with professionals to design an interactive online course on Arduino and introductory robotics for children
- Recorded twelve 45-minute course videos
- Spearheaded marketing campaign for the course, instituting referral programs, promotional videos, and social media posts
- Reached students in 4 countries and earned \$5k revenue in total

PROJECTS

Alleviate Health Inc.

Co-Founder & CTO

Feb 2023 – Present

- Wireframed and built web frontend for Alleviate Health, a platform that empowers medical professionals with AI tools that streamline administrative workflows
- Developed a voicemail sync pipeline with CloudFlare email workers that extracted mp3 files of incoming voicemails on outdated phone systems and updated database realtime with transcriptions and summaries
- Coordinated onboarding process for our 3 current paying doctors and all other prospective customers

Meditune

Developer

Feb 2022 – August 2022

- Designed and built frontend for Meditune, a mobile app that provides affordable notched sound therapy and tinnitus retraining for tinnitus patients
- Created audio-notching algorithm that filtered out specific sound frequency ranges out of mp3 files using FEmpeg
- Cold-called local doctors and EMTs to establish distribution networks for beta testing

SKILLS AND INTERESTS

- **Languages:** Python, HTML/CSS, Javascript, Typescript, Java, Dart
- **Frameworks/Libraries:** ReactJS (Next.js), Node.js, React Native, Flutter, Tailwind, ChakraUI, FastAPI, Flask
- **Databases:** SQL, Firebase, MongoDB, Neo4j, Cypher
- **ML:** Scikit-learn, Numpy, Pandas
- **Design:** Figma, Adobe Illustrator
